Summary

Second-year AI & Data Science engineering student building production-deployed full-stack applications, autonomous AI agents, and LLM-powered platforms. Founder of an open-source project with real external adoption. Interested in AI product engineering, LLM application development, and developer tooling.

Education

Vivekanand Education Society's Institute of Technology — Mumbai, MH <i>B.E. in Artificial Intelligence & Data Science</i>	2025–29
Pace Junior Science College – Thane, MH <i>H.S.C. — Percentage: 79.5%</i>	2022–24
New Horizon Scholars School – Mumbai, MH <i>S.S.C. — Percentage: 94.6%</i>	Passed 2022

Projects

InboxOS — Open-Source AI Inbox Operating System (Founder & Project Lead) <i>FastAPI, Celery, PostgreSQL, Redis, Next.js 14, OpenAI/Gemini, Ollama, Docker</i>	2026
---	------

- Founded and lead InboxOS, an open-source “decision + execution layer” for email; architected a 5-layer async pipeline (ingestion → parser → intelligence → rules → action → delivery), growing the repo to 300+ commits, 37+ tracked issues, and 16 forks
- Built multi-provider ingestion (Gmail API w/ Pub/Sub push sync, MS Graph delta sync, IMAP) with OAuth 2.0, feeding an LLM classifier that sorts mail into 8 categories with 0–100 priority scoring and deadline/action extraction
- Designed a rules DSL driving multi-channel delivery via Twilio WhatsApp, Slack, Telegram, and live WebSockets into a Next.js 14 dashboard virtual-scrolled for 10,000+ entries; top contributor (#1) with 51 commits, 23/23 PRs merged

CodeExplainer — Adaptive Code Understanding Platform <i>React 19, Vite, Zustand, Monaco Editor, Framer Motion, Mermaid.js</i>	2026
---	------

- Built an adaptive explanation engine that switches between four analysis strategies (line-by-line, chunk-based, architecture, codebase explorer) based on file size, replacing flat AI text with a structured, interactive experience
- Engineered a three-depth explanation system (30s summary, 5m overview, deep dive) pre-generated in one pass, plus a step-by-step execution timeline with a variable-state inspector and playback controls
- Implemented automatic complexity analysis (time/space, cyclomatic complexity) and Mermaid.js diagram generation that adapt to detected code structure, with non-destructive AI comments exportable to Markdown/HTML/Notion/PDF

GitStat — GitHub Contributor Health Dashboard (Runner-Up, Unimerge Hackathon) <i>React, Vite, Tailwind, Node.js, Express, Supabase, GitHub OAuth, Gemini 1.5 Flash, Vercel, Render</i>	2025
--	------

- Built a full-stack contributor health dashboard authenticating via GitHub OAuth, surfacing commit frequency, PR velocity, review participation, and inactivity signals from live GitHub API data
- Integrated Gemini 2.5 Flash to generate natural-language health summaries, translating raw activity into burnout-risk flags and personalized recommendations for maintainers
- Engineered a cross-origin deployment (Vercel frontend, Render backend) with secure session/token handling, and structured Supabase persistence for historical health-score trend comparison

Skills

Languages:	Python, JavaScript, Java
Frameworks:	React, Next.js, Node.js, Express.js, FastAPI, Flask, TensorFlow, PyTorch, Scikit-learn, Tailwind CSS
AI & ML:	Gemini API, OpenAI API, Vector Embeddings, RAG Systems, ARIMA, Generative AI
Data & Cloud:	PostgreSQL, Supabase, MongoDB, SQL, Redis, Firebase, Google Cloud
Tools:	Git, GitHub, Docker, Vite, Postman, Vercel, Render, DaVinci Resolve

Certifications & Achievements

- Google Cloud Study Jam** — Completed 20 courses (Cloud Compute, Storage, AppSheet, App Engine, Pub/Sub, Vertex AI & Gemini), organized by GDGoC at VESIT (Oct 2025)
- Runner-Up, Unimerge Hackathon** — GitStat selected as #2 among Nationwide Individuals (2025)
- Selected, Google Solution Challenge 2026** — CrisisSync chosen for Google’s global developer challenge
- Completion, Hack-AI-Thon 4.0** — Successfully completed the 24-hour hackathon

Extracurriculars

- Team AlgoMinds** — Syrus 2026 Top 6 Finalist among 500+ teams (OnboardAI, autonomous developer onboarding agent); Google Solution Challenge 2026 participant (CrisisSync)
